New Books from Cold Spring Harbor Laboratory Press

Connecting with Companies A Guide to Consulting Agreements for Biomedical Scientists

Before you sign a consulting agreement, this must-have reference will help you understand the key issues to consider—from intellectual property, confidentiality, and compensation, to often overlooked issues such as indemnity, different classes of stock, and the relevance of insider trading and securities laws.

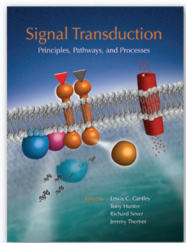

2014, 156 pp., glossary, index Hardcover \$39

Father to Son Truth, Reason, and Decency

After a lifetime of accomplishment in research, writing, education, and science advocacy, James Watson has delved for the first time publicly into his own lineage to chronicle an archetypical American family from before the Civil War to Vietnam. *Father To Son* brilliantly illuminates the fundamental truth that who we become as individuals is determined by both our genetic and cultural heritage.

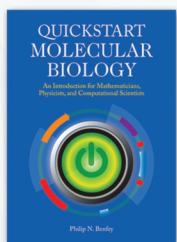

2014, 285 pp., illus., index Hardcover \$29

Signal Transduction Principles, Pathways, and Processes

This new textbook for the first time provides a comprehensive view of the subject by covering both the basic mechanisms involved and the roles of signal transduction in fundamental biological processes. It introduces the principles of signal transduction, provides 'route maps' for all the major signaling pathways, and explains how signaling pathways are integrated to control key cellular processes.

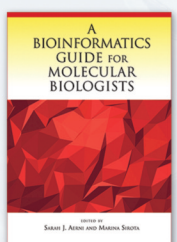

2014, 452 pp., illus., index Hardcover \$165

Quickstart Molecular Biology An Introductory Course for Mathematicians, Physicists, and Engineers

Designed for mathematicians, physicists, and engineers, this book introduces the basic features of DNA, proteins, and cells but in the context of recent technological advances, such as next generation sequencing and high-throughput screens, and their applications. This enables readers to move rapidly from the basics to an understanding of cutting-edge research in systems biology and genomics.

2014, 168 pp., illus., index Paperback \$45 Hardcover \$79

A Bioinformatics Guide for Molecular Biologists

Many investigators are either unaware of the ways in which informatics can improve their research or find it inaccessible due to a feeling of "informatics anxiety." This book is a must-read for those interested in learning informatics techniques required for successful research and development in the laboratory.

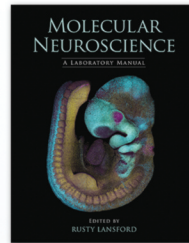

2014, 328 pp., illus., index Hardcover \$79

Experimental Design for Biologists Second Edition

The second edition of this thoroughly updated handbook explains how to establish the framework for an experimental project, how to set up all of the components of an experimental system, design experiments within that system, determine and use the correct set of controls, and formulate models to test the veracity and resiliency of the data.

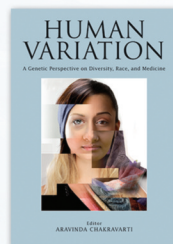

2014, 304 pp., illus., index Hardcover \$39

Molecular Neuroscience A Laboratory Manual

Neuroscientists must now routinely use advanced molecular biology and tissue culture techniques in their research. This book provides a detailed practical guide to both fundamental and cutting-edge methods in these areas. Aimed specifically at neuroscientists, it includes protocols for working with DNA and RNA, cell purification and tissue culture, and microscopy, as well as numerous organism-specific techniques.

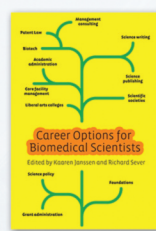

2014, 648 pp., illus., index Hardcover \$150 Paperback \$90

Human Variation A Genetic Perspective on Diversity, Race, and Medicine

This book provides a state-of-the-art view of human genetic variation and what we can infer from it, surveying the genetic diversity seen in Africa, Europe, the Americas, and India. The contributors discuss what this analysis tells us about human history and how it can be used to improve human health.

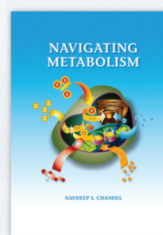

2014, 144 pp., illus., index Hardcover \$75 Paperback \$59

Career Options for Biomedical Scientists

This book examines the numerous different careers that scientists leaving the bench can pursue, from the perspectives of individuals who have successfully made the transition. In each case, it sets out what the job involves and describes the qualifications and skills sets required.

October 2014, 232 pp., illus., index Hardcover \$45

Navigating Metabolism

Metabolic pathways used to be 'road maps' most biologists learnt as undergraduates and then promptly forgot. Recent work has revealed how changes in metabolism are closely linked to many aspects of cell behavior and the development of cancer and other diseases. This book represents both a new look at metabolism and a refresher course.

November 2014, 264 pp., illus., index Paperback \$49 Hardcover \$79

Manuals from Cold Spring Harbor Laboratory Press

Antibodies A Laboratory Manual, Second Edition

An essential resource for molecular biology, immunology, and cell culture labs, revised, extended, and updated by Edward Greenfield of the Dana-Farber Cancer Center, with contributions from other leaders in the field.

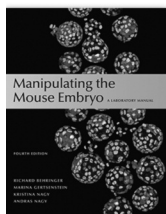

2014, 847 pp., illus., index Hardcover \$260
Paperback \$175

Purifying and Culturing Neural Cells A Laboratory Manual

An essential laboratory companion for all neurobiologists that provides step-by-step protocols for isolating specific cell populations from rodent neural tissues and culturing them under conditions that closely resemble those *in vivo*.

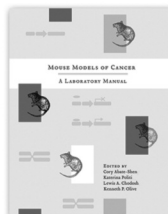

2014, 205 pp., illus., index Hardcover \$135
Paperback \$89

Manipulating the Mouse Embryo A Laboratory Manual, Fourth Edition

The definitive reference source on mouse development, transgenesis techniques, and molecular biology has been reorganized and updated to include brand new information and protocols.

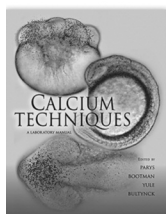

2014, 814 pp., illus., index Hardcover \$240
Paperback \$165

Mouse Models of Cancer A Laboratory Manual

The laboratory mouse is an important model for studying cancer and its treatment. This manual describes strategies to generate and characterize mouse models that accurately recapitulate many features of human cancer.

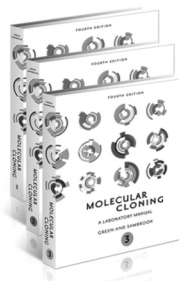

2014, 521 pp., illus., index Hardcover \$240
Paperback \$165

Calcium Techniques A Laboratory Manual

Calcium ions regulate muscle contraction, nerve impulses, fertilization, and numerous other cellular processes. This manual provides a diverse range of reliable techniques to study the movement of calcium ions and the effectors involved.

2014, 608 pp., illus., index Hardcover \$150
Paperback \$95

Molecular Cloning A Laboratory Manual, Fourth Edition

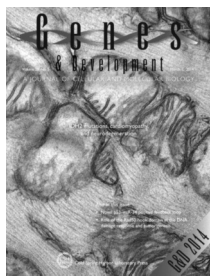

Molecular Cloning has served as the foundation of technical expertise in labs worldwide for 30 years. The new edition contains essential updates and twelve innovative new chapters of methods based on a decade's worth of new research.

2012, 2028 pp., illus., appendices, index
Hardcover (three-volume set) \$395
Paperback (three-volume set) \$365

Journals from Cold Spring Harbor Laboratory Press

Request a Free Trial for Your Institution!

Genes & Development

Publishes research papers of general interest and biological significance in molecular biology, molecular genetics, and related areas.

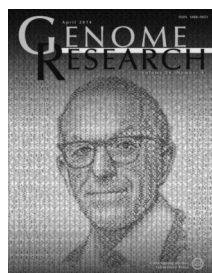

ISSN 0890-9369

24 semi-monthly print issues

PLUS online access

Published in association with The Genetics Society.

www.genesdev.org

Genome Research

Focuses on genome studies in all species, including genetic and physical mapping, DNA sequencing, genome discovery informatics, statistical and mathematical methods and genome structure and function as well as technological innovations and applications.

ISSN 1088-9051

12 monthly print issues PLUS online access

www.genome.org

CSH Perspectives in Medicine

See our full page ad (back cover) for more information.

ISSN 2157-1422

www.cshmedicine.org

CSH Perspectives in Biology

A New Type of Review Journal.

Spanning the complete spectrum of the molecular life sciences, the journal offers article collections that comprehensively survey topics in molecular, cell, and developmental biology, genetics, neuroscience, immunology, cancer biology, and molecular pathology.

ISSN 1943-0264

12 monthly issues, online only

www.cshperspectives.org

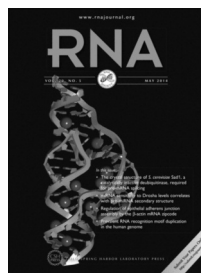

LEARNING & MEMORY

Publishes research papers on all types of learning, memory, and their models, conducted in humans and vertebrate and invertebrate species with the following approaches: behavior, cognition, neuroanatomy, neurophysiology, neuropharmacology, biochemistry, genetics, and cell and molecular biology.

ISSN 1549-5485

12 monthly issues, online only

www.learnmem.org

RNA

RNA, the publication of the RNA Society, publishes high quality research papers that provide significant new insight into any area of RNA biology, including molecular biology, cell biology, biochemistry, bioinformatics, genetics and evolution.

ISSN 1355-8382

12 monthly print issues PLUS online access

Published on behalf of The RNA Society.

www.rnajournal.org

CSH Protocols

The development of *CSH Protocols* is a response to requests from scientists for authoritative information about techniques with a broad editorial scope, delivered through a state-of-the-art online interface. At this site, you will find methods along with protocols from many of our best-selling manuals as well as protocols from Cold Spring Harbor's renowned on-site courses.

ISSN 1559-6095

12 monthly issues, online only

Visit: www.cshlpress.org

Cold Spring Harbor Laboratory Press now outsources order processing and warehouse operations to Oxford University Press (OUP) in Cary, NC. Billing and shipping will originate from OUP.

Prices subject to change. Please visit our website at www.cshlpress.org

About Cold Spring Harbor Laboratory Press

Cold Spring Harbor Laboratory Press is an internationally renowned publisher of books, journals, and electronic media, located on Long Island, New York. Since 1933, it has furthered the advance and spread of scientific knowledge in all areas of genetics and molecular biology, including cancer biology, plant science, bioinformatics, and neurobiology. It is a division of Cold Spring Harbor Laboratory, an innovator in life science research and the education of scientists, students, and the public.

Support Research and Save on Books—Join Our Discount Program!

Did you know that buying directly from CSHL Press enables you to save money on any title we publish? As a member of our Discount Program, you will enjoy prices that are frequently lower than those of any other online book site.

Program benefits for individuals include:

- A 10% discount, in addition to other promotional discounts, on all web orders (individuals only)
- Advance notice of new publications
- Free shipping to US & Canada
- Exclusive special offers and online prices.

Regardless of where you make your purchase, all revenue from sales of CSHL Press publications supports research at Cold Spring Harbor Laboratory.

Cold Spring Harbor Perspectives in Medicine

A New Type of Review Journal in Molecular Medicine

www.cshmedicine.org

Cold Spring Harbor Laboratory Press announces the launch of a new monthly online publication, *Cold Spring Harbor Perspectives in Medicine*. Covering everything from the molecular and cellular bases of disease to translational medicine and new therapeutic strategies, each issue offers reviews on different aspects of a variety of diseases and the tissues they affect. The contributions are written by experts in each field and commissioned as Subject Collections by a board of eminent scientists and physicians. These Subject Collections gradually accumulate articles as new issues of the journal are published and, when complete, each Subject Collection represents a comprehensive survey of the field it covers. *Cold Spring Harbor Perspectives in Medicine* is thus unmatched for its depth of coverage and represents an essential source for informed surveys and critical discussion of advances in molecular medicine.

Scope: Translational Medicine, Molecular Pathology, Cancer Therapy, Genetics, Infectious Disease, Immunology, Molecular Cell Biology

Frequency: Monthly, online only

ISSN: 2157-1422

Subject coverage includes:

Addiction	Heart Disease
Aging	Hemoglobin
Alzheimer Disease	HIV
Anemia	Influenza
Antibiotic Resistance	Malaria
Bacterial Pathogens	Multiple Sclerosis
Bone Disease	Muscular Dystrophy
Cancer	Parkinson's Disease
Cystic Fibrosis	Prion Diseases
Diabetes	Skin Diseases
	Schizophrenia
